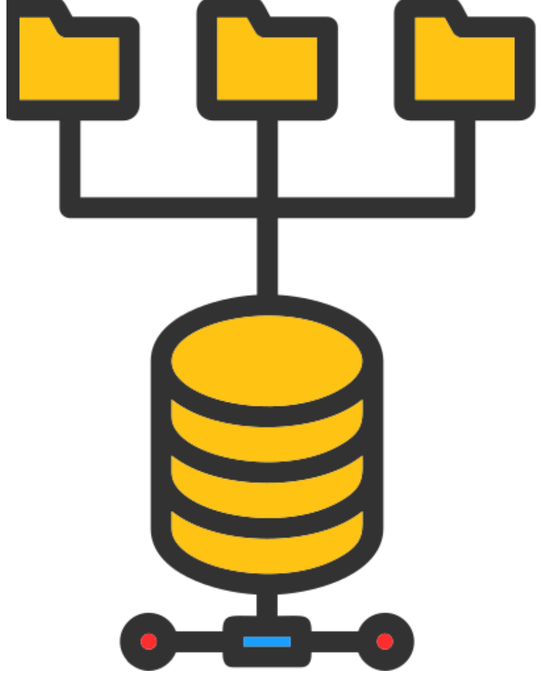
06 Recommendation

BUSINESS PROBLEM

- Our company aims to establish a new movie studio but lacks industry insights.
- This analysis identifies profitable film genres using data-driven methods.

OBJECTIVES

- Maximize Return on Investment (ROI)
- Identify high-revenue genres
- Understand impact of ratings
- Determine optimal release seasons



DATA SOURCES

•(***Multiple sources data in different formats)***

- Box Office Mojo (Revenue)
- IMDb (Ratings & Genres)
- •Rotten Tomatoes (Reviews)
- TheMovieDB (Popularity)
- The Numbers (Budgets)

METHODOLOGY

- Data cleaning & integration
- Genre and revenue analysis
- ROI computation
- Seasonality analysis
- Comparative insights

DATA CLEANING

- Handling missing values
- Handling duplicated values
- Merging data sets across data sources
- Standardizing primary titles, colums & formats

EDA

We analyzed multiple movie datasets to uncover patterns in genres, budgets, ratings, and box office performance. This EDA highlights which films are most profitable and well-received, guiding strategic investment decisions.

Business pespectives analysed to make recommendations

Reviews and Ratings

Do higher critic scores (Imdb) lead to higher box office revenue?

Popularity

Which genres and themes attract higher revenue ?

Seasonality

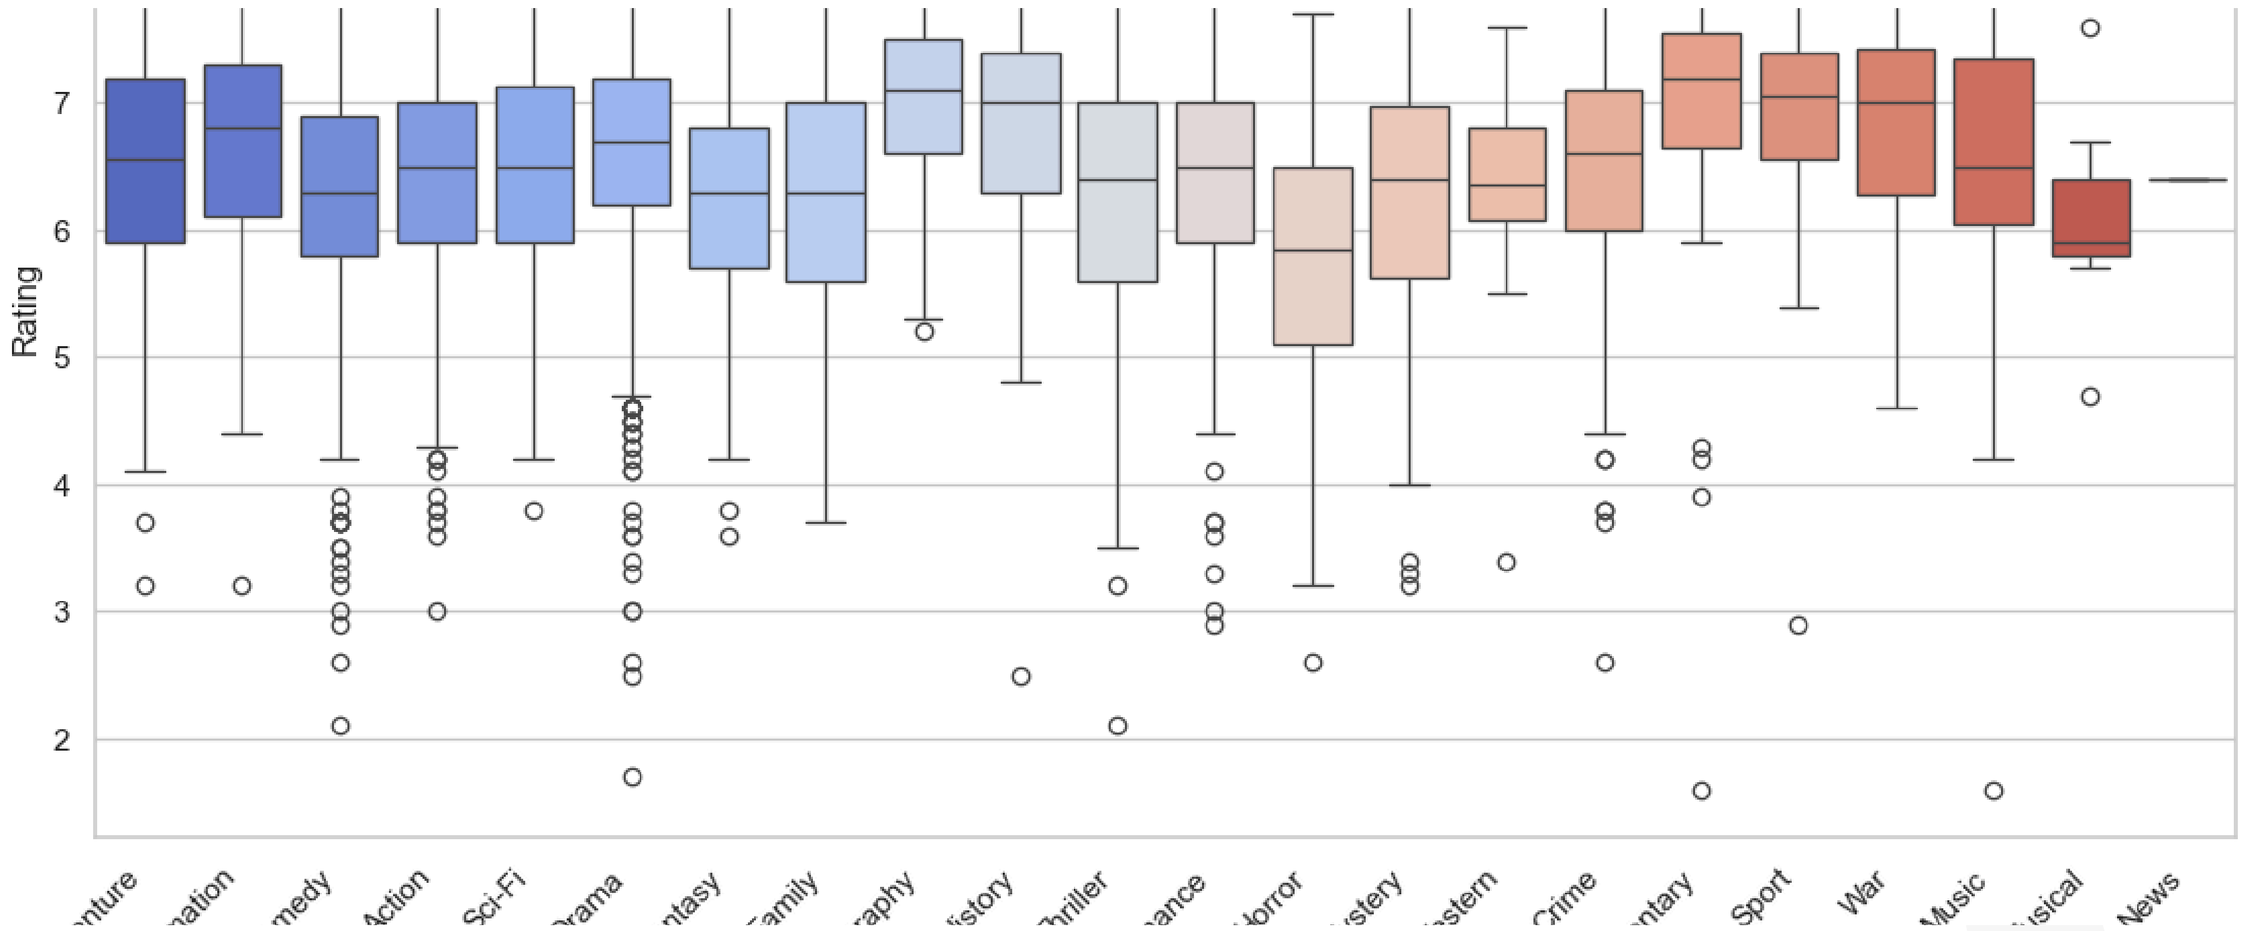
Which months or seasons generate the highest box office revenues?

Return on Investments

How does production budget influence box office revenue?

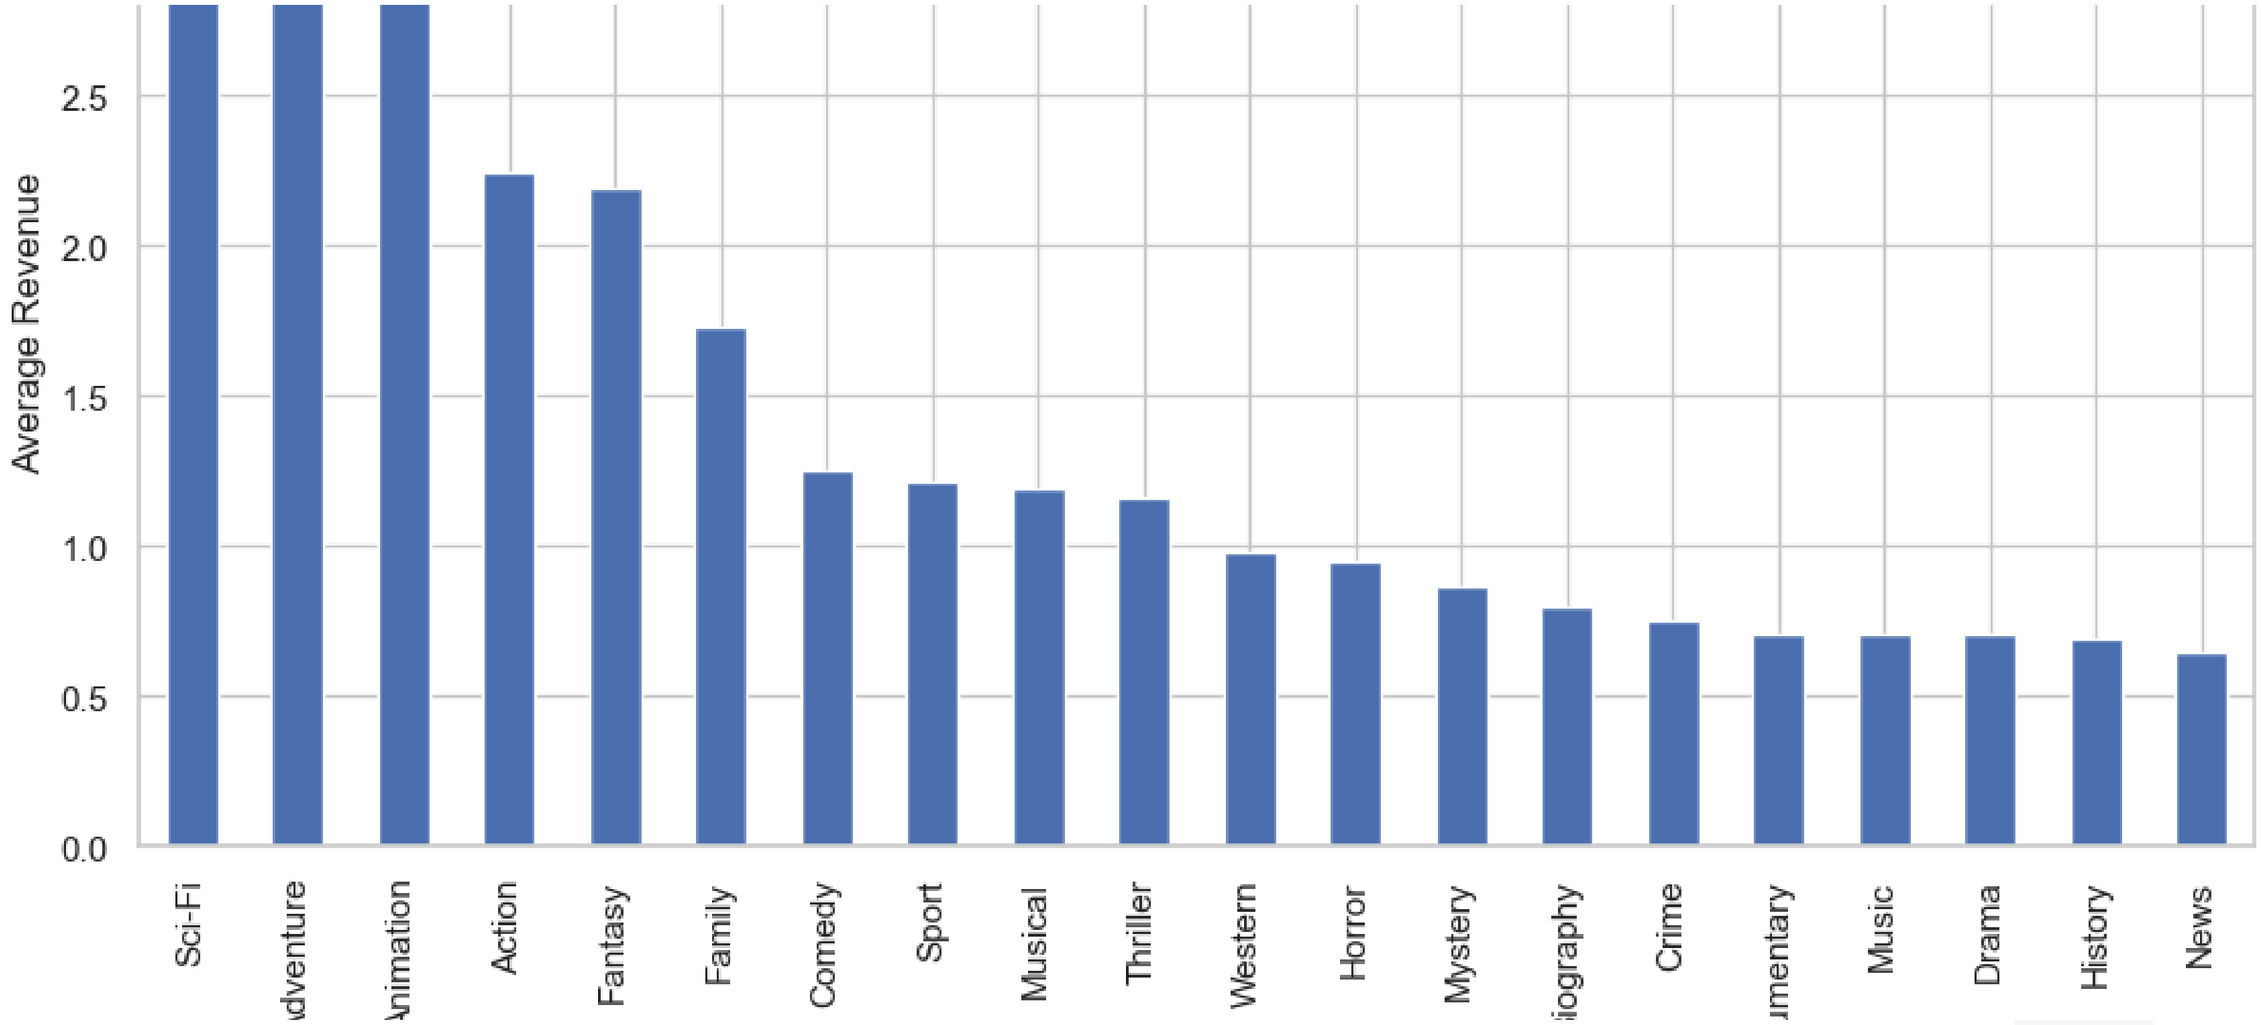
REVIEWS & RATINGS

Higher-rated movies are more likely to generate revenue and enhance studio reputation. From our analysis, the highly rated genres are documentary, biography and sport.



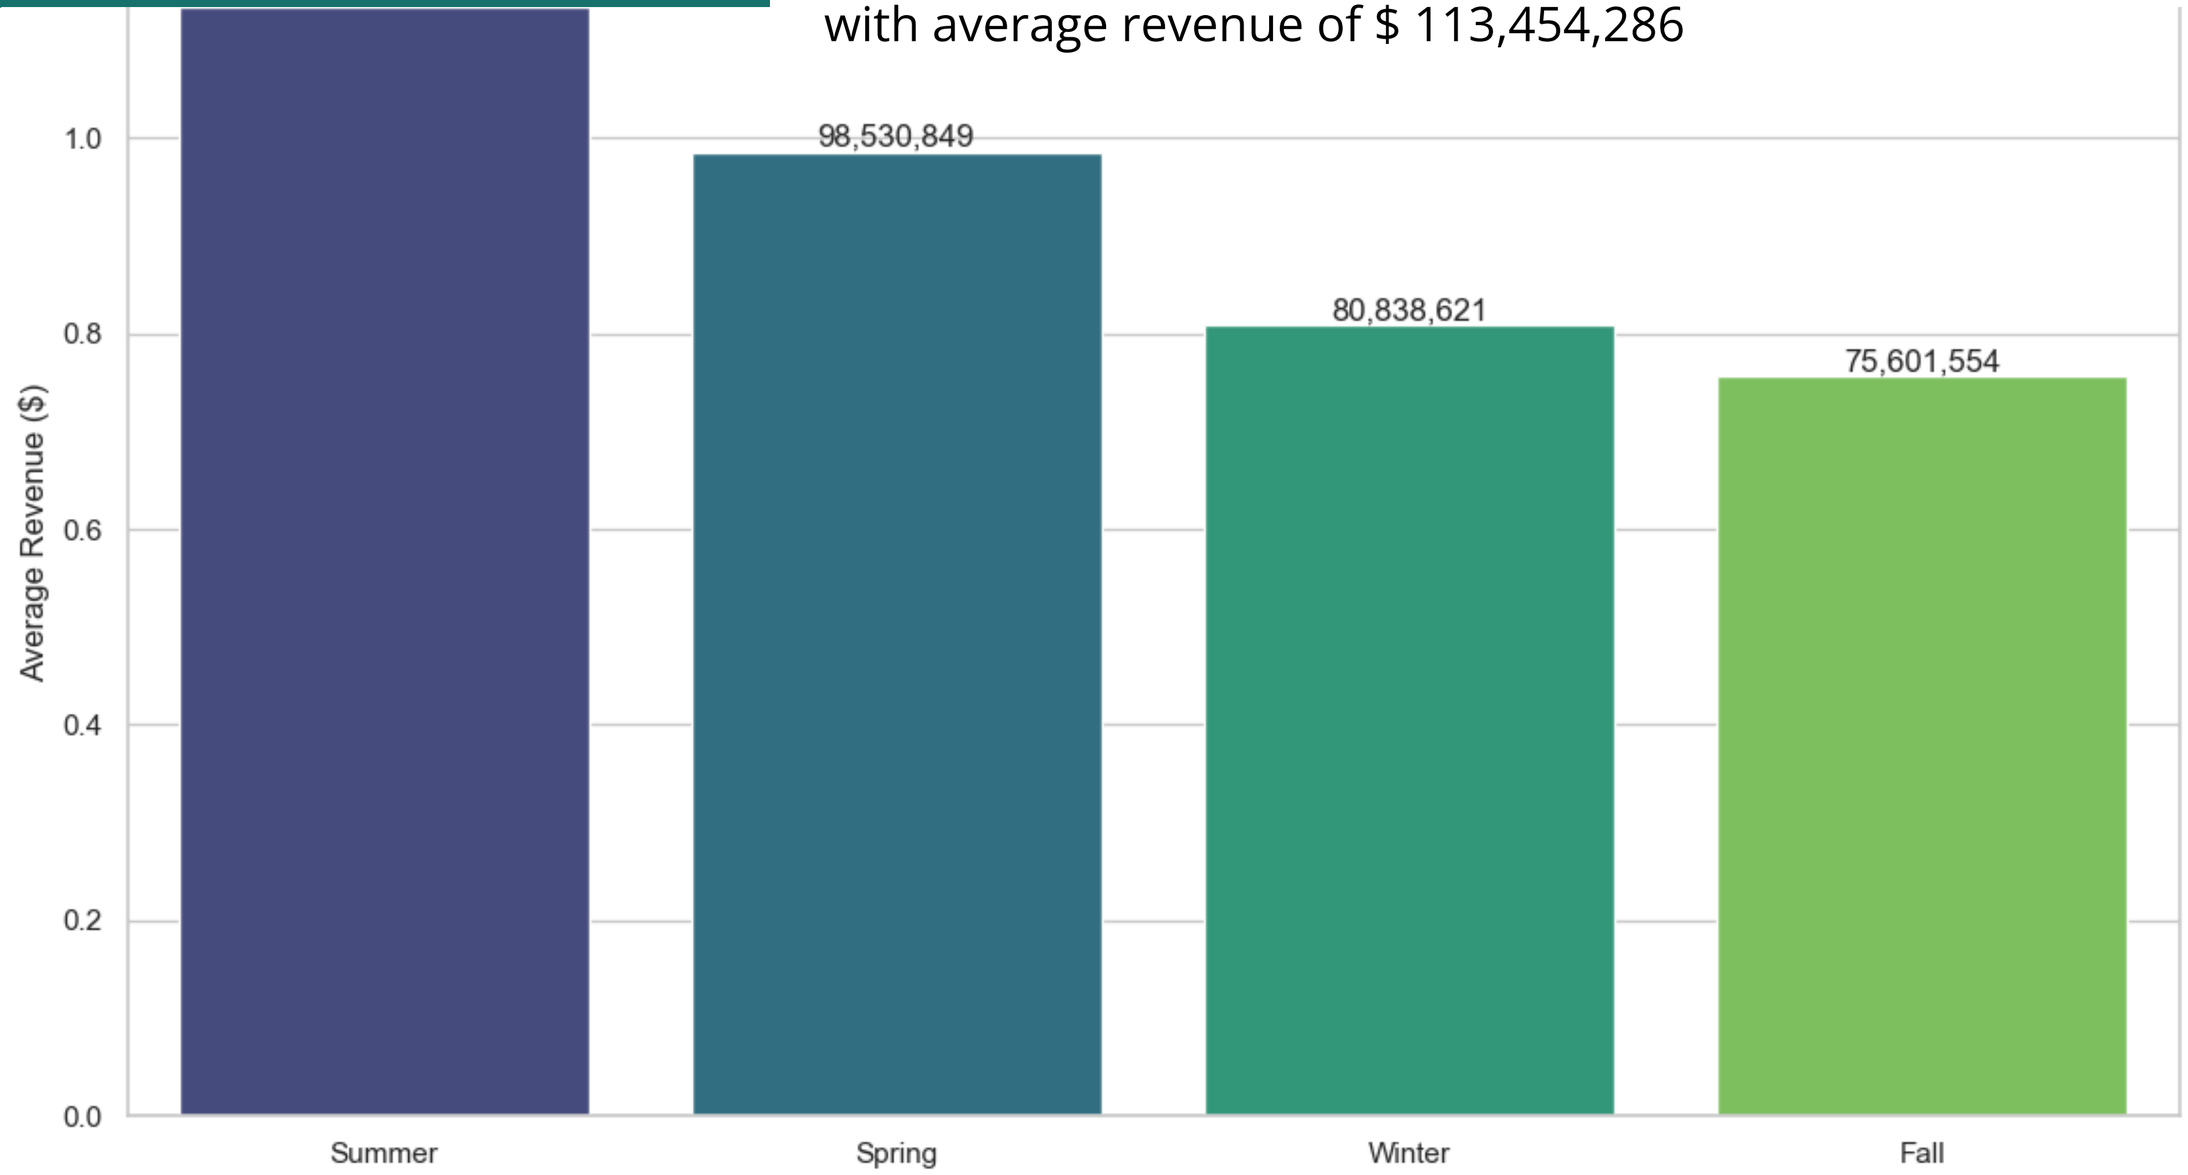
POPULARITY

Focus on producing Sci-Fi, Adventure, and Animation films, which show consistently high revenue and profitability. Consider niche genres strategically to diversify risk.



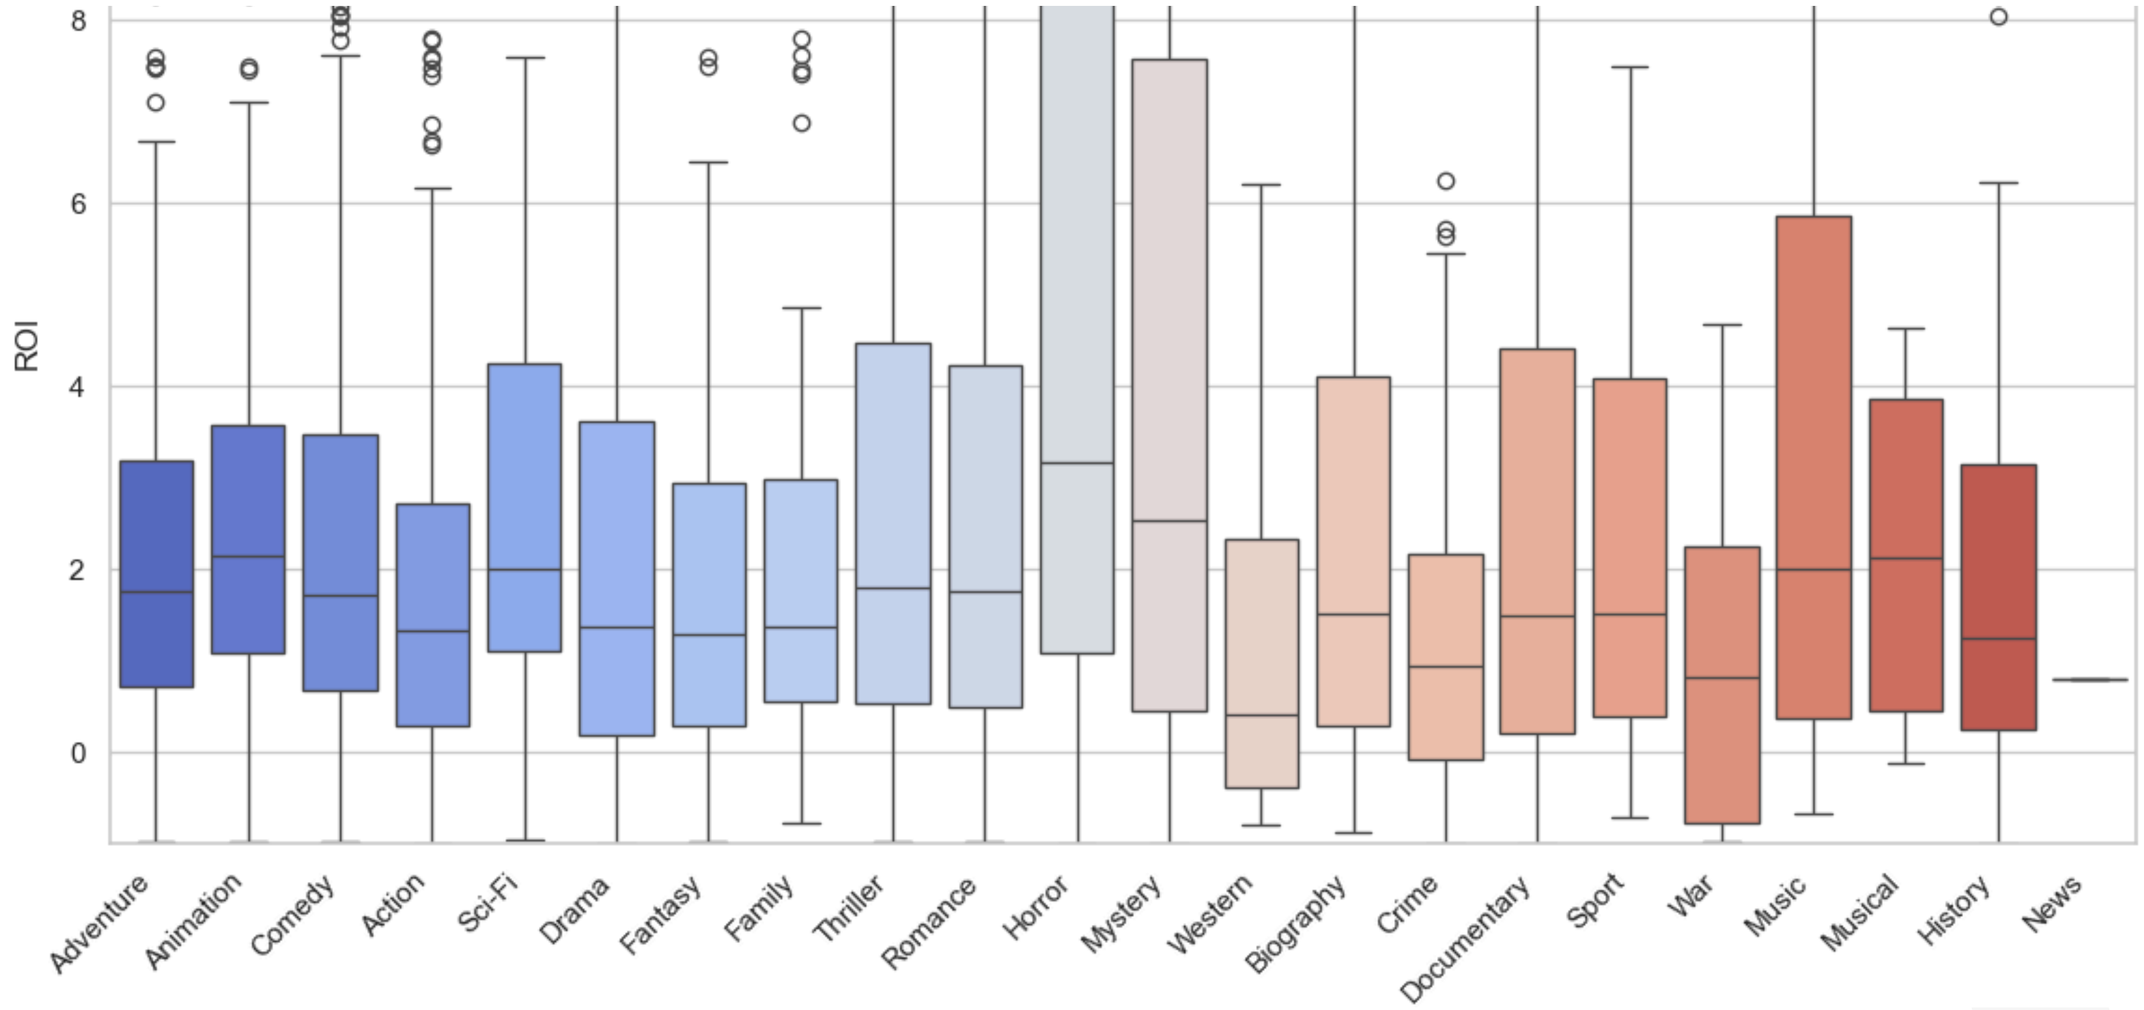
SEASONALITY

Plan release schedules around peak viewing periods (holidays, summer, or award season) to maximize box office performance. From our data analysis the best release season was in summer with average revenue of $ 113,454,286



ROI

ROI-Focused Decision Making: Track both revenue and ROI for each project. A lower-budget film with high ROI is more valuable than a high-budget. From our data analysis, horror & mystery genres have both low production budget and higher returns



OVERALL RECOMMENDATION

The studio should prioritize Animation, Sci-Fi, and sport as they offer the best balance of profitability, revenue, and audience ratings. Animation is ideal for high revenue and long-term growth, Sci-Fi provides strong global appeal and solid returns, while Biography delivers high audience satisfaction and brand credibility.

THANK YOU

FOR YOUR NICE ATTENTION
